Summary

Results-driven Data Analyst and Software Engineer with proven experience building scalable data infrastructure at Uber. Expert in leveraging SQL, Python, and APIs to optimize complex workflows and integrated systems. Translates large-scale datasets into strategic Power BI and Tableau dashboards for cross-functional stakeholders. Proactively drives data-driven decision-making, achieving 98% reporting accuracy and 40% process efficiency increase.

Experience

Data Analytics Engineer

May 2026 – Present

Belluz Concrete & Rentals (Northwestern Ontario Innovation Center)

Thunder Bay, ON

- Build an automated BI pipeline using Python, PostgreSQL, APIs to streamline real-time business data extraction.
- Develop dynamic Power BI dashboards with daily refreshes to visualize core KPIs and boost tracking efficiency.

Teaching Assistant - Cloud Computing for AI and ML

Jun 2025 – Aug 2025

Lakehead University

Thunder Bay, ON

- Guided 50+ students through Python and AWS cloud environments, driving practical execution and debugging across data analysis workflows and model deployment.

Data Engineer & Analyst

Feb 2023 – Aug 2024

Uber (On-site Vendor - NINELEAPS Technology Solutions)

Bangalore, India

- Architected 10+ Python, SQL, GCP ETL pipelines processing 100K+ daily records, achieving 98% reporting accuracy.
- Engineered backend queries and dashboards across 5 major projects, driving a 40% increase in process efficiency.

ML Intern

Jun 2021 – Aug 2021

Knowledge Solutions India

Bangalore, India

- Designed a K-Means clustering model to evaluate performance data from 1,000+ colleges, forecasting graduation trends with 87% accuracy.
- Deployed a Logistic Regression heart disease prediction model, classifying diverse health risks with 89% accuracy.

Technical Skills

Data Analysis & Visualization: Python, SQL, Tableau, Power BI, Looker Studio, Excel

Databases & Cloud: MySQL, AWS, Google Cloud Platform (GCP)

APIs & Web Frameworks: Postman, REST APIs, Requests, FastAPI, Flask, React.js, HTML, CSS

Project Tools & Advanced Analytics: JIRA, Git, XGBoost, PyTorch, 3D-CNNs, MAML, Optuna, Dlib

Projects

Uber GSS Ads-Ops & Rider Analytics | *Python, SQL, Tableau, JIRA, QueryBuilder, uWor*

- Optimized backend SQL pipelines processing 100K+ daily records from Uber Rides and Eats to track global revenue.
- Resolved critical bugs via JIRA to drive continuous backend improvements, ensuring 100% uptime for business tools.

Deepfake-Resilient Authentication | *PyTorch, FastAPI, React.js, WebRTC, 3D-CNN, MAML*

[View Here](#)

- Designed PyTorch 3D-CNN and MAML framework, achieving detection accuracy of 100% (GRID) and 98.1% (FF++).
- Implemented live FastAPI and React.js authentication system, reducing verification latency to sub-5s via WebRTC sliding windows.

Jobtrix - AI-Powered Job Portal | *Python, Flask REST API, MySQL, XGBoost, Requests*

[View Here](#)

- Built a Flask application with a custom XGBoost model, delivering highly targeted role matches for 500+ users.
- Automated scraping pipeline using Requests to clean and load 1,000+ live job postings into MySQL with 95% accuracy.

Education

Lakehead University

Sep. 2024 – May 2026

Master of Science in Computer Science - CGPA : 94.33%

Thunder Bay, Canada

Courses: Database Management Systems, Software Engineering & Agile Methodologies, Machine Learning, Data Structures & Algorithms, Artificial Intelligence

Medals & Awards:

- Governor-General's Gold Medal (May 2026)
- Dean's Scholar Award for Science and Environmental Studies (May 2026)
